About Us

BUILDING BETTER PLAYGROUNDS SINCE 2016

We are part of the Active8 Leisure group and have been building engaging playgrounds for schools, nurseries and public spaces across the UAE for over 10 years.

Designed and built in the UAE using European safety certified materials.

It's our aim to empower your children; to ignite their imagination & creativity and to develop their social & physical skills.

BoomTree's unique designs also use sustainably-sourced materials that are natural, durable and long lasting.

Our Vision

Empowering Children Through Play

At BoomTree, we believe play is how kids learn best—by moving, imagining, and connecting with others.

We design playgrounds that do more than entertain. They help children grow in confidence, creativity, and curiosity.

Our spaces encourage:

IMAGINATION
Open-ended play
that sparks
creativity

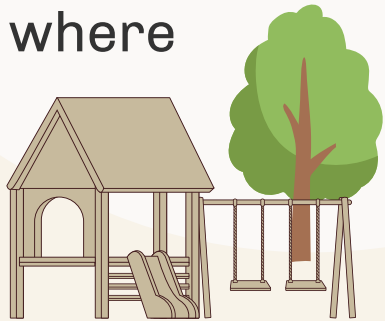

DISCOVERY
Movement that
builds skills and
resilience

CONNECTION
Shared
experiences that
bring kids together

We're here to build safe, sustainable, and inspiring spaces where children can thrive.

Why Choose Us

We Build with Purpose

Sustainably-sourced

We use high-quality European pressure-treated pine wood from responsibly managed forests.

Certified Safe

All our materials and designs meet strict EU safety standards, giving parents and schools peace of mind.

Built in the UAE

From concept to completion, our playgrounds are assembled right here in the UAE—ensuring quality control and local support.

Made to Fit

No two spaces are the same. That's why we design every playground to suit your site, your vision, and the children who will use it.

CASE STUDIES

We have delivered playgrounds across established UAE communities including:

- Polo Townhouses
- Victory Heights
- The Els Club
- Nasma Residences
- Green Community

To create safe, engaging spaces that integrate seamlessly into their surroundings and enhance everyday community living.

Nasma Residences

THE BRIEF

Nasma Residences required a family-focused outdoor play space that would complement the community setting while catering to children of different ages. The goal was to create an engaging, safe, and visually natural environment that encourages active play and social interaction.

OUR APPROACH

We designed a bespoke playground that blends seamlessly into the landscape, using natural timber structures and varied play elements to suit a wide age range. The layout was carefully planned to include climbing features, slides, balance elements, and open play zones.

OUTCOME

The completed playground has become a vibrant hub within Nasma Residences, bringing families together in a safe and engaging environment.

The Els Club

THE BRIEF

The Els Club required a compact, family-friendly play area that would complement its outdoor leisure environment while providing a safe and engaging space for children.

OUR APPROACH

We designed a durable timber play structure featuring dual slides, climbing access, and elevated platforms, ensuring a balance of active play and ease of use. The materials and layout were selected to blend naturally with the surroundings while maintaining high safety and durability standards.

THE RESULT

The completed play area enhances the overall family offering at The Els Club, providing a well-used, attractive space where children can play while parents relax—adding both functionality and value to the venue.

Victory Heights

THE BRIEF

Victory Heights required a vibrant, inclusive play space that could cater to a wide range of ages while fitting naturally within a landscaped residential setting.

OUR APPROACH

We developed a dynamic playground featuring climbing structures, slides, swings, and interactive elements, all positioned beneath shaded canopies to ensure year-round usability. The layout was designed to encourage movement, social interaction, and safe play within a clearly defined, community-friendly space.

OUTCOME

The completed playground is a lively focal point within Victory Heights, heavily used by families and children. It brings the community together, offering a safe, engaging environment that enhances everyday outdoor living.

Green Community

THE BRIEF

The Green Community required flagship play spaces that would serve as central hubs for families, offering a wide range of activities within a natural, landscaped setting.

OUR APPROACH

We executed a comprehensive community-wide playground initiative in The Greens, delivering six high-quality outdoor play environments across strategically selected locations. The project required full lifecycle management—from concept design through to installation—ensuring consistency, safety, and a premium finish across all sites.

THE RESULT

The results were dynamic, high-impact community spaces that encourage exploration, social interaction, and active play, becoming key destinations within the neighbourhood.

Garage Play Space

THE BRIEF

A private villa owner was keen to include as many play elements as possible, despite the restricted footprint. She wanted climbing features, imaginative play options, and enough room for the kids to enjoy the space with their friends.

OUR APPROACH

We adapted the design to fit the space, connecting two play towers to form a single structure. Features included a rope climb, ladder, slide, and playhouse, plus a picnic table for games and role play. Natural materials helped keep the space light and welcoming.

OUTCOME

The finished space is now a well-loved play hub that fits perfectly in the garage. It's practical, sociable, and full of variety—exactly what they hoped for.

Nad Al Sheba Nursery

THE BRIEF

The nursery was keen to go beyond the typical playground setup. They wanted a space that celebrated Arabic culture through design and play features—somewhere children could connect with heritage while still developing essential physical and social skills.

OUR APPROACH

For the indoor space, we created a mini souk-style play village, complete with market stalls, arched doorways, traditional signage, and cosy role play zones. Outdoors, we introduced Arabic craft walls, using natural textures and traditional patterns to encourage sensory exploration and creativity.

THE RESULT

The final play areas have become a real point of pride for the nursery. Children are not only engaged in active, creative play, but are also immersed in an environment that reflects their heritage and surroundings.

Star International School

THE BRIEF

Star International School contacted us with a clear goal: to enhance their outdoor area for their youngest learners. They needed age-appropriate play equipment that would support physical development and creativity, along with outdoor classroom spaces that would allow teaching to continue outside in the cooler weather.

OUR APPROACH

We worked closely with the school team to understand the needs of their early years students. Our design balanced active play with quiet learning zones, making full use of the available space.

Key elements included:

- Low-level climbing and balance structures to encourage gross motor skills
- Imaginative play features for creative exploration
- Covered outdoor classroom areas equipped for small group learning and storytelling

OUTCOME

The completed space is now a vibrant and flexible environment where young children can play, learn, and thrive outdoors. The outdoor classrooms are regularly used for teaching sessions, while the play equipment has been a hit with students and staff alike.

Mandarin Oriental Emirates Palace

THE BRIEF

The Mandarin Oriental Emirates Palace wanted to create a durable outdoor playground to connect their indoor kids club and beach activities.

OUR APPROACH

We created a contemporary custom playground design in keeping with the hotel's new rebrand aesthetics. Built in sustainable wood, this environmentally friendly structure created a natural link between trees, sand and the water.

- Rock climb and net climbing walls for adventure.
- Slides, double swing and nest swing for fun.
- Lookout towers and suspension bridge for exploring.

THE RESULT

The beach playground is now a key destination for young hotel guests and kids club activities. It has created a stylish and exciting hub between the land and the sea where kids can explore the playground's challenges with unique sea and hotel views.

Lapita, Dubai Parks & Resorts

THE BRIEF

Lapita Hotel set out to transform their indoor kids club into a more engaging, on-brand space that enhances the family guest experience while reflecting the resort's Polynesian-inspired identity.

OUR APPROACH

We reimagined the space as an immersive, tropical environment—bringing the outdoors in through natural textures, vibrant tones, and layered design elements. The transformation included custom flooring, hand-painted green walls, island-themed wallpaper, and tree-top canopy structures to create a sense of depth and adventure. Bespoke timber play equipment was carefully integrated to encourage both active movement and imaginative play.

THE RESULT

The result is a vibrant, island-inspired kids club that aligns seamlessly with the resort's overall aesthetic. The upgraded space offers a more engaging experience for younger guests, enhances the hotel's family appeal, and adds long-term value to the guest journey.

TESTIMONIALS

Client Testimonials

"BoomTree Playgrounds has been our trusted partner for play equipment for years. Their team is professional, friendly, and always responsive. The equipment is high-quality, safe, and tailored to fit any space—no matter the size. Every project feels truly bespoke, and working with them is always a smooth, positive experience."

Maple Bear Nurseries

"Great work on our Kids Club renovation! We're genuinely very happy with the result and appreciate the collaboration."

Lapita Management

"BoomTree created the most amazing playground for our villa. The kids spend hours outside now, and it's become the neighborhood favorite. The quality and attention to detail is outstanding."
